Hi everyone.

As expected, INGAA has provided additional follow up from our discussion earlier this month on the 2014 CAPP Emission Factor update study. The state in the attached that they spoke with David Picard with Clearstone to get clarification on OEL monitoring and have made additional assumptions to estimate that annual monitoring achieves 70-75% control.

Ex. 5 Deliberative Process (DP)

Thanks!
Karen

Karen,

By way of follow-up to our last call, our contractor, IES has reached out to Clearstone and prepared the attached memo addressing surveys of OELs. Please let me know if you think it would be helpful to schedule a call to discuss.
